

Service Technician

Rio Vista, CA

REpower USA Corp, a part of REpower Systems SE, produces the world's largest and most technically advanced commercial wind turbines and is a global leader in turbine manufacturing and supply. Our emerging global presence allows us to offer challenging, international careers.

Position Summary

A Service Technician is responsible for performing preventative and scheduled and/or as-needed maintenance or modification to ensure proper and continuous operations of REpower Systems AG wind turbines in the U.S. In addition the technician is expected to efficiently troubleshoot and rectify wind turbine faults using strong analytical skills and a methodical approach. The work involves both electrical and mechanical work at wind power plant sites in the U.S. **This is a match for individuals with aviation experience like avionics, crew chief, electricians and other fields like these.**

Specific Duties and Responsibilities:

- Successfully complete required training as directed by the O & M Manager or Training Manager
- Perform on-site maintenance on wind turbine equipment in accordance with OEM maintenance manuals and training.
- Safely perform basic troubleshooting of wind turbines
- Functional testing and analysis of electrical circuits.
- Perform mechanical and electrical component repair or replacements of parts.
- Collect turbine data for research or analysis.
- Complete reports and paperwork as required.
- Effectively and concisely communicate with other departments and explain findings.
- Follow safety regulations and work procedures.
- Perform all other duties as assigned.

Qualifications

- Ability to climb 200+ foot wind towers on a daily basis and work in confined spaces under all types of weather conditions for extended periods.
- Physically fit! Daily climbing of wind towers.
- Ability to work around low to medium voltage (< 575 volts)
- Ability to read schematics
- Strong verbal and written communication skills.
- Advanced knowledge of maintenance and electrical testing equipment for turbines, machinery, or aviation.
- Advanced computers skills, including word processing, spreadsheets, diagnostic tools and equipment.
- Able to work overtime, holidays, weekends on short notice with ability to meet strict deadlines
- Ability to work safely both independently and as a team with minimal supervision.
- Valid drivers license
- Ability to travel both domestically and internationally

Benefits

- \$18-21 an hour (Depending on experience)
- Full medical benefits
- 401K matching
- 15 days of paid time off (PTO)
