

Sexual Assault Victim Services Resource Guide

Sexual assault is a crime

Victims should not have to recover from sexual assault alone.

* Items marked with this symbol indicate resources that are not required to file investigative reports. Additional confidential resources include psychotherapist and legal assistance attorneys. Commanders and leaders in the chain of command are not able to keep sexual assault reports confidential. They must investigate all allegations.

There are resources available to provide victims with emotional support. The California National Guard provides professional resources that care about you and what you have gone through.
